Ziosoft and Global Imaging Online Announce Integration and Reseller Agreement for France and Maghreb Area

Global Imaging Online will introduce the Ziostation® 3D advanced visualization software to the French market as an integrated product

Montreuil (93) – France - October 1st 2009 -- Ziosoft®, Inc. a leader in advanced visualization and analysis software for medical imaging and Global Imaging Online, French leader of PACS, RIS and Tele-Radiology solutions, announced today that the companies have signed an agreement for Global Imaging Online to distribute advanced 3D : thin-client software solutions in France.

The Ziostation system integrates seamlessly with the Global Imaging Online PACS solutions – DIAM4 servers. The Ziostation solution provides advanced visualization tools including CT and MR cardiac function analysis, calcium scoring, CT brain perfusion, advanced vessel analysis, colon analysis and multi-modality fusion analysis.

“I am excited about introducing Ziosoft’s 3D thin-client software in France “said Rainer Kabouya, new CEO of Global Imaging Online. ”The breadth of products Ziosoft offers, the enterprise wide architecture and the exceptional system performance is a great complement to the current solutions of Global Imaging Online, and a major interest to the French radiology community. It will be a great addition for Global Imaging Online to the Tele-radiology solutions introduced in January 2009 with Expertise Radiologie partnership. I invite
